## Our Mission

Pangaea Exploration believe that the depth and complexity of the threats to our oceans is significant but practical solutions and the resources to implement them do still exist. The central challenge is our collective will to act, to care. We believe our ultimate success depends on a future generation of inspired conservationists. We strive to:

- 1) Actively strengthen the health of marine life through Exploration, Conservation and Educational work;
- 2) Inspire and develop a new generation of leaders in conservation, science, communication, education, art and policy leadership;
- 3) Provide information and enjoyable ocean sailing expeditions to guest crew, creating personal connections with the oceans and like-minded people.
